

OrderFTP 8.0

Compatibility:

Currently, we can only support Windows XP 32-bit, Vista 32-bit, and some older versions of Windows. We need to rewrite the software from scratch to gain compatibility with:

- Windows XP 64-bit (Not too common)
- Vista 64-bit
- Windows 7 (Basically Vista Revised, Starts shipping October 2009)

Bottom line: Customers should either be on Windows XP (Preferred) or Vista 32bit

- Does the customer need shelf tags?
- Does the customer need the zapper (scanner)?
- If they only have a small order guide (authorized list) and are asking for “on-line ordering”, they only need the program (software) which can be downloaded from our website.
- Notify Inside Sales & Data Processing so we know how to expect the customer’s order to come in.

When viewing the order in the application if you click on any of the column headings a brief explanation is displayed. The item status has been enhanced to be more accurate and informative.

Richmond-Master Order

For help on a column click it's heading. To delete an item click on the button to it's left and then press delete.
