

# Turn Off User Control in VISTA or Windows 7

## Windows 7:

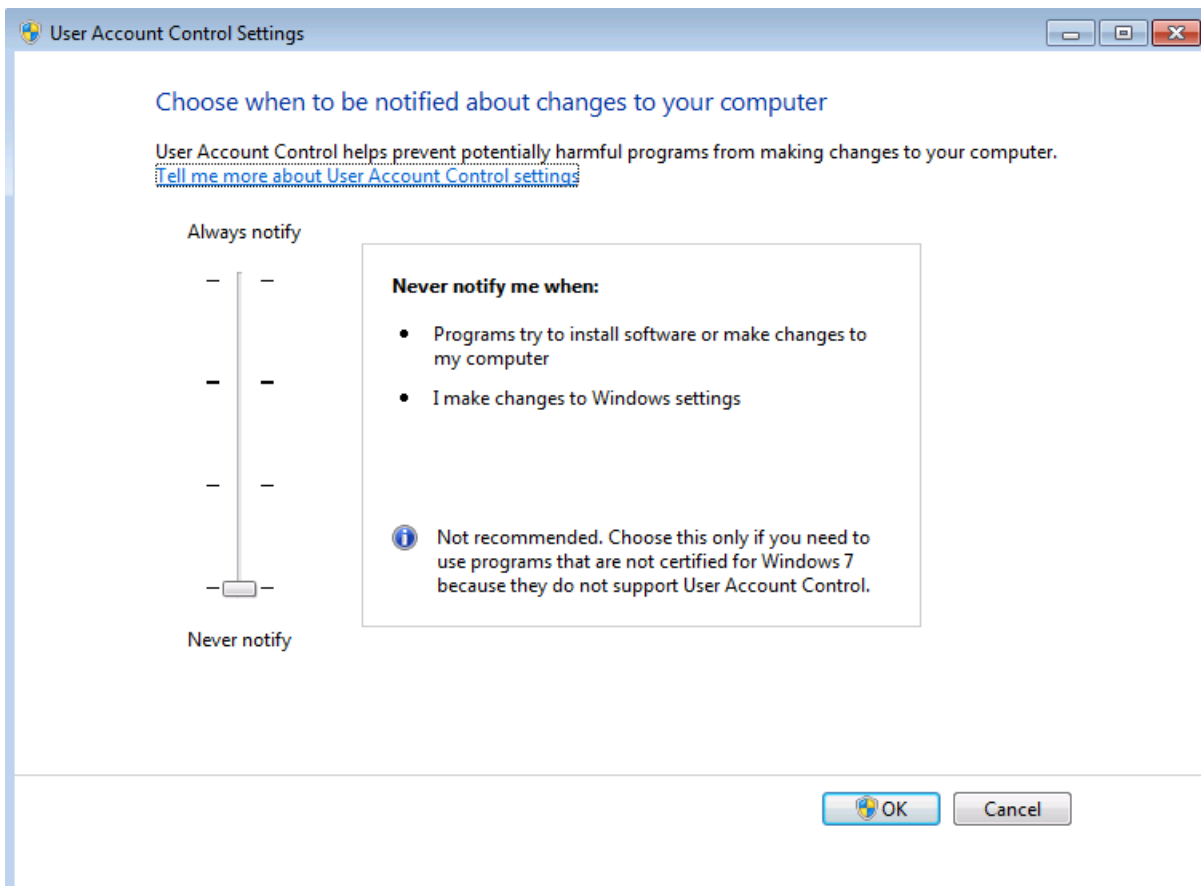

Go to Control Panel

Click on User Accounts  User Accounts

Click on Change User Account Control settings  Change User Account Control settings

Change the bar to the very bottom "Never notify" then click OK

## Vista:

### Turn User Account Control on or off

User Account Control (UAC) can help you prevent unauthorized changes to your computer. It works by prompting you for permission when a task requires administrative rights, such as installing software or changing settings that affect other users.

We don't recommend turning User Account Control off. If you do turn it off, you should turn it back on as soon as possible.

1. Open User Accounts by clicking the **Start** button , clicking **Control Panel**, clicking **User Accounts and Family Safety** (or clicking **User Accounts**, if you are connected to a network domain), and then clicking **User Accounts**.
2. Click **Turn User Account Control on or off**.  If you are prompted for an administrator password or confirmation, type the password or provide confirmation.
3. Select the **Use User Account Control (UAC) to help protect your computer** check box to turn on UAC, or clear the check box to turn off UAC, and then click **OK**.
